***Graphing calculators (TI-84 or higher) are allowed to be used on the 8th grade Math and Science STAAR tests and are used almost every day during math class. They will also be used in future math classes throughout high school. If purchasing is not an option, there is a limited number available for use at school. The school graphing calculators are not allowed to be taken from the classroom, so students will need their own if they plan to complete work at home.**
